**RE: Technical specifications for the purchase of three Coffee Espresso Machines and two Coffee Grinders under IACO-ICO-GIZ project**

**I. Context and justification of the work**

The Inter-African Coffee Organisation (IACO) aims to transform the African coffee sector into "a modernized, competitive and sustainable coffee industry, which emphasizes quality and productivity, and which benefits all actors in the sector".

Within the overarching vision of transforming the African coffee sector, IACO is partnering with the International Coffee Organization (ICO) in the development and implementation of the ICO's Coffee Public Private Task Force (CPPTF). A pivotal focus area within this initiative is the enhancement of domestic coffee consumption in Africa.

In alignment with this objective, and under the project titled "Facilitating the Implementation of the Living Prosperous Income (LPI) Commitments," funded by GIZ, IACO is strategically planning the procurement of three coffee espresso machines and two coffee grinders. These resources are intended to provide substantial support to member countries in their respective endeavors to promote and boost domestic coffee consumption across the African continent.

The machines will have the following technical specifications.
